PALM BEACH GARDENS, Fla., Dec. 20 /PRNewswire/ -- Accident Prevention Plus (OTC Bulletin Board: ACDT) was featured today in "Larry Oakley's Opinion" column at www.WallStreetCorner.com.

In his column, Oakley states: "I'm impressed with ACDT's technology -- it provides some exceptional benefits to transportation operations and safety, growing technology of this industry and its future potential is massive in my opinion. ACDT, which recently announced a reverse split to satisfy a condition necessary to qualify for American Stock Exchange listing within the next fiscal year, has done the majority of business in Europe and is virtually unknown in the investment community.

The Company designs, develops, markets and sells a comprehensive line of onboard computer recording and communications systems, the APP1000, APP2000, and the APP3000 (herein after called the AP+ Series). Based on the smart card technology, currently used as an individual identification card and a portable database, the AP+ Series of products includes but is not limited to:

- * An "On Board Recorder" that monitors and records data for accident prevention, driver training and evaluation, and maintenance operations for fleets of vehicles.
- * A range of sensors designed and developed by the company such as the "dual axis accelerometer" to measure the sway of the vehicle, the "fuel gauge sensor" to detect fuel theft and a "throttle sensor" to measure the position of the gas pedal to name a few.
- * SmartCard, which is operator sensitive and will disable vehicles from operation unless engaged by the driver, this feature is key in anti theft of all trucks, cars, buses and any transportation vehicle.
- * A range of "MS Windows(TM)" compatible software allowing data analysis in both the driver evaluation, training and general fleet management fields of application.

Currently, there are 9 million truck drivers, over 2000 Companies with 50 trucks or more and an evaluated shortage of 400,000 truck drivers to be hired. This segment of industry represents in the United States alone a market of 375 million for on board monitoring and evaluation equipment. These numbers do not include the industries such as rental cars, courier trucks, passenger buses, moving companies, privately owned consumer cars, etc.
